

Hemp Hurd

GRADING GUIDE

All grades available in 25 pound bags, super sacks and truckloads.

Large

Average size $\frac{3}{4}$ + inch

Low dust

Use in hempcrete building materials, composites, animal bedding

Medium

Average size $\frac{1}{2}$ - inch

Low dust

Use in bioplastics, composites and building materials

Fines

Average size $\frac{1}{4}$ - inch

Use in composites, saw dust replacement, bio absorbent

Micronized Hurd

100-300 microns

Use in pulping, composites and building materials

Fiber, First Pass

Fibers are 1-4 inches long, material contains 5-10% hurd

Low dust

Use in further processing--highly absorbent and insulative
